MPP Catherine Fife Delivers Members Statement on Class 1's Fight to Reduce HAIs

See video of statement here: <https://youtu.be/dsj-5O090lo>

On February 18, 2016 MPP Catherine Fife delivered a statement in the Ontario Legislature about the important work being done by Class 1 Inc. to fight hospital acquired infections (HAIs).

Catherine detailed Class 1's efforts to work with other Ontario companies to develop new technologies to reduce the many infections acquired by patients in Ontario hospitals each year. HAIs are the 3rd leading cause of death in Canada, more than car accidents, breast cancer and HIV combined. The estimated cost of these infections is 1.5 billion every year. The cost of prevention is far lower than the cost of treating patients who are unnecessarily infected during their stay at a hospital. Class 1 made a submission to this year's Ontario budget requesting funding support for hospitals to purchase engineered infection prevention technology. MPP Fife expressed hope the 2016 budget would reflect this much needed and important investment in the healthcare sector.
