

## AutoUV

EIP | Communications | Water | Accessories

**Model#: AUTOUV**

**Product Specification:**

The Patient Room AutoUV system from Class 1 takes surface disinfection to the next level by automatically disinfecting contaminated & problematic areas of a patient room that may contribute to HAIs. Completely automated with features such as safety door switches and redundant infra-red motion detectors, the AutoUV system will only operate in an unoccupied patient room basking high-touch areas with high-intensity UVC (254 nm) germicidal light achieving up to a 6 log reduction on contaminants such as MRSA, C. difficile & VRE.
