PRESS RELEASE
9 A.M. EDT, September 14, 2015

Class 1 Fortifies All-Canadian Business with Vancouver Area Office Opening and a Trio of Hires

Class 1 Inc., the leader in Canada for medical gas pipeline supply, installation and service in healthcare facilities with locations in Cambridge, Montreal and Winnipeg has reinforced its western Canada offering with the opening of a new Vancouver area office in Coquitlam, BC at 2235 Hartley Avenue.

The new Vancouver area operation will be led by Mark Johnston, Class 1's Western Canada Construction Manager. Mark has over 10 years' experience managing P3 med gas projects as a foreman and project manager.

Class 1 has also expanded its western construction project management and maintenance team operating out of the new location:

- Barry Menzies, Class 1's western Canada Project Manager, will be the foreman for the new BC Children's and Women's construction project (and others to come after that). Barry has over 7 years' experience as foreman for med gas construction and installation projects in the western region.
- Jason Shaw, is the new Class 1 western Canada Medical Systems Technician. Jason has been a med gas service technician for 7 years (3 in the BC region) and has experience in cryogenic vessel maintenance.

Chris Over, Class 1's Vice President of Construction Services commented: "We continue to be successful in healthcare construction and have several current construction projects in western Canada. This new Vancouver area office provides Class 1 with local office support and warehouse facilities and facilitates timely equipment start-ups. It was important to us to establish local project management and service support to supplement our new *Sentinel* Remote Monitoring 24/7 healthcare facilities services support. Our success is based on hiring the best. I am delighted with Mark's caliber and contacts and his ability to spearhead the new Vancouver area operation."

About Class 1 Inc.

Class 1 Inc. is a leading provider of medical gas equipment and services, on-site Oxygen production, UVC room disinfection and halogenated drug recovery services to hospitals from coast-to-coast in Canada and internationally.

They are a leading Canadian manufacturer of medical vacuum and medical air systems, medical supply units, medical gas pipeline components, and isolated power centres. They also distribute respiratory equipment related to medical gas systems.

The Class 1 Medical Gas Systems Division performs complete turnkey, design-build, and subcontract medical gas pipeline installations for hospitals.

The Class 1 Facility Services group provides preventive maintenance, 24/7 emergency service, systems management including Sentinel Remote Monitoring that provides access to facility equipment information and camera views from any wireless device.

Class 1 Inc. is 100% Canadian owned and operated.
